

# CHAIN LINK CURTAIN

Our chain link curtain is constructed from an anodised aluminium header rail with individual chain links hanging from the rail to form a barrier against pests. Ideal for the front or rear of the smaller business or domestic premises. Quick and easy to install. This curtain is designed for easy access, and is fully removable in seconds. Our chain link curtain is available either in kit form to construct yourselves, supply only made up and ready to hang, or supplied and fitted on-site.

**A COST EFFECTIVE FLYSCREEN SYSTEM  
THAT CLEANS UP THE HYGIENE LEGISLATION**

## CHAIN LINK DOOR

<u>How they work</u>	Each curtain consists of individual lengths of aluminium chain hanging down from a top track. These form a curtain that is easily accessed whilst still forming a physical barrier that pests find difficult to pass through.
<u>Suitability</u>	The most cost effective method to cover a door opening. Use it where you are unable to hang a conventional screen door. Ideal for the front and rear entrances of both shops and domestic premises. Can be made to any width. Avoid contact with prams and trolleys if possible.
<u>Removal</u>	The complete chain curtain can be removed and re-sited to another wall or surface for overnight storage.
<u>Maintenance</u>	Every curtain can be restored to its original colour by rinsing in a container of soapy water. The aluminium links are anodised and will not rust. Replacement links are available on request.
<u>Technical</u>	There are approximately 75 chains to each standard door width, with an average weight of 10lbs.
