

# DOUBLE SLIDING SCREEN

Our double sliding fly screen unit, available in horizontal or vertical options. Two powder coated aluminium framed fly screens, each screen moving independently in the sliding channels of the outer framework allowing easy movement and access to windows. Each screen is fully removable for cleaning or servicing.

**A COST EFFECTIVE FLYSCREEN SYSTEM  
THAT CLEANS UP THE HYGIENE LEGISLATION**

## SLIDING FLY SCREENS

<u>How they work</u>	The screens outer framework is fitted to the inside of the window reveal or is fitted to the face or the reveal. Each screen, when closed, overlaps in the centre providing a seal between the screens and outer framework.
<u>Suitability</u>	Can be used in front of any window that has a reveal. Cost effective when screening a window with multiple opening lights. Can be made with three sliding screens (triple slider) for extra wide windows. This unit is available in vertical sliding as well as horizontal sliding formats making it ideal to install in front of a sliding sash window.
<u>Removal</u>	Outer framework cannot be removed easily. To remove screens, lift up and out. To remove vertical sliding screens, pull packer away to either side and lift out screens.
<u>Maintenance</u>	The powder coating can be cleaned with a cream cleaner to restore its original condition. All meshes can be cleaned with warm, soapy water to remove grease or dirt. Dusty screens should be vacuumed or brushed clean.
<u>Technical</u>	Standard colours – White to BS9010 and brown to BS8017 The standard range of colours can be matched at extra cost. Fibre mesh – 18 x 14 weave, charcoal, ventilation 66% Fibre mesh – 20 x 20 weave, charcoal, ventilation 32% Stainless steel – 18 x 14 weave, charcoal, ventilation 66% Aluminium - 18 x 14 weave, charcoal, ventilation 66%
<u>Guarantee</u>	12 months on all workmanship under normal wear and tear.
