

# HEAVY DUTY DOOR

A heavy framed aluminium door, powder coated white, and fitted with our strong, yet, decorative security grill incorporated within the door. This door is recommended for industrial applications, where deliveries are being made, or a great deal of traffic is passing through.

**A COST EFFECTIVE FLYSCREEN SYSTEM  
THAT CLEANS UP THE HYGIENE LEGISLATION**

## HEAVY-DUTY SCREEN DOOR

<u>How they work</u>	A single action door designed to work in front of, or behind the existing door and can be hinged to the existing framework or to our plastic sub-frame if you need to clear handle obstructions. Comes complete with its own automatic closure.
<u>Suitability</u>	This door can be fitted to UPVC, timber or metal casings and is designed to take the bumps, knocks and extra traffic that is found in busy or commercial premises. Fly mesh will only push out or come loose if the push and kick plates are not used when opening the door.
<u>Removal</u>	Door and closure can be removed without the use of specialised tools.
<u>Maintenance</u>	The door closure is maintenance free. To keep the door hinges working effectively, spray WD40 or a little light machinery oil into the moving parts periodically. The powder coating can be cleaned with a cream cleaner to restore its original condition. All meshes can be cleaned with warm, soapy water to remove grease or dirt. Dusty screens should be vacuumed or brushed clean.
<u>Technical</u>	Standard colours – White to BS9010 and brown to BS8017 The standard range of colours can be matched at extra cost. Fibre mesh – 18 x 14 weave, charcoal, ventilation 66% Fibre mesh – 20 x 20 weave, charcoal, ventilation 32% Stainless steel – 18 x 14 weave, charcoal, ventilation 66% Aluminium - 18 x 14 weave, charcoal, ventilation 66% Standard sizes up to 2.1 metres high x 1 metre wide.
<u>Guarantee</u>	12 months on all workmanship under normal wear and tear.
