

# PVC STRIP CURTAINS

PVC strip curtains are ideal where frequent access is required but where minimal heat loss or protection from bad weather are important economic considerations. With PVC strip curtains individual strips hang down from a metal track with is secured to the head of the opening. Each strip overlaps the next to form a flexible sheet that will cover any size of opening yet still be accessible by pedestrians or vehicles. The hanging track, suspension plates and fixings are all maintenance free. The PVC strips can be power washed or steam cleaned when required.

**PVC CURTAINS ARE IDEAL FOR EASY  
VEHICULAR AND PEDESTRIAN ACCESS**

## PVC STRIP CURTAINS

- How they work Individual PVC strips hang down from a metal track, which is secured, to the head of the opening. Each strip overlaps the next to form a flexible sheet that will cover any size opening, yet still be accessible by pedestrians or vehicles.
- Suitability Any size or shape openings to loading bays or warehouse doorways that receives traffic.  
PVC curtains can be installed behind roller shutters and concertina doors for two-way visibility for pedestrian and vehicular access. PVC curtains can be made to slide.  
Chiller rooms and freezers can maintain low temperatures by using polar grade PVC strips. PVC curtains are excellent at reducing or containing noise levels within factory areas.
- Removal The hanging track is fixed on permanently. You can choose between our stainless steel hook-on system and our bolt-on aluminium track system.
- Maintenance The hanging tracks, Plates, nuts & bolt are all maintenance free. PVC curtains can be power washed or steam cleaned if required. Individual strips will need replacing from time to time as they lose their transparency; this depends on how often the curtain is passed through by wagons and stacker trucks. Replacement strips are easily obtainable. Please call our quote line on 01663 735152 for a quote.
