

# VENTALITE SCREENS

Ventalite roller screens are a cost effective way of screening multiple opening casements in one window. It consists of a top fitted powder coated aluminium cassette unit with side channels to allow the mesh to slide easily down into locating clips. Ventalite roller screens have been designed to be unobtrusive, yet effective. This affordable fly screen is ideal for office or domestic applications.

**A COST EFFECTIVE FLYSCREEN SYSTEM  
THAT CLEANS UP THE HYGIENE LEGISLATION**

## VENTALITE ROLLER FLY SCREENS.

<u>How they work</u>	Specially designed with a top fitted retractable cassette, complete with side channels, that allows the insect mesh to slide between brush seals inside the channel and locking into place at the bottom.
<u>Suitability</u>	This screen can be fitted over any UPVC, timber or metal casements. Sometimes, it is necessary to use our special plastic build off sub-frame to clear existing handles. This screen can be fitted inside the window reveal or can be fitted to the face of the reveal.
<u>Removal</u>	This screen cannot be removed once fitted.
<u>Maintenance</u>	The powder coating can be cleaned with a cream cleaner to restore its original condition. All meshes can be cleaned with warm, soapy water to remove grease or dirt. Dusty screens should be vacuumed or brushed clean.
<u>Technical</u>	Standard colour – White to BS9010. Fibre mesh – 18 x 14 weave, charcoal, ventilation 66%
<u>Guarantee</u>	12 months on all workmanship under normal wear and tear.
